

Mayank Singhal

Vice Chairperson & Managing Director, PI Industries

Mr. Mayank Singhal is the Vice Chairperson and Managing Director of PI Industries, founded in 1946, a global life sciences organisation driven by innovation across agrisciences, biologicals, pharmaceuticals, specialty chemicals and electronic chemicals.

Over the past three decades, he has been at the helm of PI's transformation from a domestic agricultural business into a global life sciences organisation. Guided by a vision to take innovation from India to the world, he has shaped a distinctive positioning for PI at the intersection of science and technology, first in agrisciences and increasingly across biologicals, pharmaceuticals and specialty chemicals.

Under his leadership, PI has evolved into a global innovation partner, bringing new technologies to Indian agriculture while building world-class capabilities in the development and manufacturing of complex chemistries for leading global innovators. The company is now extending this foundation into proprietary innovation, biologicals and pharmaceuticals.

PI today has one of the largest research-led platforms in its industry, powered by more than 700 scientists and 200 PhDs, with capabilities spanning discovery, development and manufacturing. The company has a presence across 40+ countries, with operations across the United States, Brazil, Mexico, Europe, Japan, China and Australia.

Sustainability is integral to Mayank's approach to growth. PI ranks among the top 2 percentile of ESG-rated companies globally and, in 2026, was included in the S&P Global Sustainability Yearbook for the third consecutive year.

At the heart of his leadership philosophy is a constant focus on "what next": anticipating the evolving needs of customers, identifying new avenues for growth and building technologies and capabilities that can be taken to scale.

His leadership has been widely recognised. Mayank has been named India's Best CEO in Agriculture & Allied by Business Today and Asia's Promising Business Leader by The Economic Times. Under his stewardship, PI has also earned global recognition for its standards of safety and sustainability, including the British Safety Council's Sword of Honour and the Business Leader of the Year, ESG Award from Chemtech.
